JELLYFISH SERIES

hand-blown glass and neon
size varies: 12"-16" wide x 30"- 44" tall

Certainly the most dramatic sculptures in the "Venusian World," Ehlenberger's luminous "Jellyfish" suspend in mid-air and glow with a life of their own. Individually handblown by the artist with careful attention to detail, the neon tentacles radiate with rich and subtle hues.

Each "Jellyfish" is unique and is powered by a 12VDC adaptor which plugs into a standard 110 volt electric outlet and is suspended from the ceiling by a thin acrylic-coated stainless steel cable. While strong enough to be shown individually, the "Jellyfish" have an especially powerful impact when displayed as a group.
