Venusian Clamora I

16" x 8" x 6"

V. Clamora VII

V. Clamora X

V. Clamora IV

VENUSIAN CLAMORA SERIES

size varies
glass and neon

An underwater element of Ehlenberger's "Venusian World," the "Venusian Clamora" consists of complex, manipulated neon tubes emanating from clam-like bodies of hand-blown glass. These sculptures are designed so that all of the components are easily separated from one another. The bases come in multiple sizes and designs and the wireless neon tubes are easily removeable and interchangeable.
