Venusian Swamp Garden I

### VENUSIAN SWAMP GARDEN SERIES

oak pedestal, cast and blown glass, neon  
36" x 18" height varies: 30"-48"

The "Venusian Swamp Gardens" continue a series of sculptures which engage the viewer in fantasy renditions of life on Venus. As independent dioramas, the "Swamp Gardens" incorporate many interchangeable elements to build a microcosm of a luminous Venusian swamp environment.

The pedestal base is made of hand-worked oak with an underlit plexiglas foundation for the neon and glass. There are multiple housings to hold the glass and neon "Swamp Flowers," cast glass "Swamp Grass" and neon "buds," allowing for many different configurations for the garden. The pedestals, available in different sizes, are designed to join together with other pedestals thus allowing for multiple garden configurations of various sizes and shapes.
